

# INTERNATIONAL NEPAL FELLOWSHIP [INF]

## BIOMEDICAL ENGINEER

 POKHARA, NEPAL

**December 2023**

INF has an exciting opportunity to serve, develop and expand the biomedical engineering department in **Green Pastures Hospital and Rehabilitation Centre**. Established only a few years ago, the department has developed to provide preventive maintenance and repair of medical devices as well as advising on the procurement process.

A recent innovation is the creation of online user training material to ensure the safe use of medical equipment. The next steps will be to further mature the department, to extend and build its capacity in skill and human resource, and also to incorporate the provision of biomedical services into INF's other two hospitals. Skills and knowledge transfer to governmental hospitals and biomedical services can also be explored.

**Please note that INF is unable to pay salaries to expatriate workers in Nepal.**

Years of Service in Nepal

**Please note that INF is unable to pay salaries to expatriate workers in Nepal.**
